

BETTER WATER = BETTER COFFEE®

AQUIEM®

COFFEE'S MISSING ELEMENT®

COFFEE IS 98% WATER.

There have been hundreds if not thousands of studies conducted and articles written by coffee experts outlining the composition of water that should be used to brew the “perfect cup of coffee.” Despite all of the available information, most gourmet coffee drinkers continue to use tap water, bottled water (which is typically no more than filtered tap water) or filtered water.

The fact remains that all of these water sources do not meet the composition of water highly recommended by coffee experts. Please note that while gourmet coffee drinkers continue to spend more of their money on better coffee beans and better coffee machines, they are still forced to use less than optimal water. Considering coffee is comprised of 98% water, they are not receiving the quality and great taste they want and expect. This is why we created Aquiem®.

Aquiem® is water specially formulated for brewing the “perfect cup of coffee.” It is purified and blended with essential minerals to enhance the consistency, taste and aroma of any coffee.

Aquiem® is great for:

- Single Serve
- Hot/Iced Tea
- French Press
- Cold Brew

PRODUCT & MARKETING INFORMATION: AQUIEM® COFFEE WATER

*We believe Aquiem® is a natural,
great fit for gourmet coffee drinkers.*

Since water quality directly affects the taste of your coffee, shouldn't you be using the best water possible? Aquiem® is purified water with essential minerals added to enhance the flavor of your coffee. Only Aquiem® consistently delivers the best in taste without any of the impurities found in most common water sources used to brew coffee. Using Aquiem® allows you to experience the optimized flavor of your coffee as it was meant to be enjoyed.
